WHY RECYCLE BETTER?

- It conserves natural resources, prevents pollution and saves energy.
- The challenge is to reduce recycling contamination. Contamination occurs when incorrect materials are included in your recycling bin.
- The main cause of recycling contamination is aspirational recycling, often called “wishcycling”, which occurs when an item goes into the recycling bin with the hope that it will find its way to the right place.
- Items such as plastic bags, batteries, cords and clothing can have detrimental effects.

Learn the acceptable and unacceptable items on the posters enclosed and throw only acceptable items in your recycling bin.

HOW TO RECYCLE BETTER!

MAKE SURE ITEMS ARE EMPTY, CLEAN AND LOOSE.

- Don't bag recyclables.
- Keep items loose as well as free of food and liquid.

MAKE SURE ITEMS ARE EMPTY, CLEAN AND LOOSE.

- Recycling is great but waste reduction is even better. Reduce, reuse, or donate whenever you can.
- When in doubt, throw it out.
