

STREET LIGHT MAINTENANCE
All residents of Hidden Meadows

Please read.

The street light on your front lawn is very important to all of us. It is the only source of light on the streets between dusk and dawn. These lights were installed and are maintained by all of us through Hidden Meadows. The Board of Directors would like each and every light to be operating each and every night for the safe passage and use of the roadways located within the Park. Therefore, it becomes the responsibility of each resident to monitor the operation of “their” light. If the in-house switch is turned on and the light does not work, you should obtain a “Resident Request for Street Light Repair” form from the mail room, or on our web page under <Info@croftoninc.com>, fill it out and return as shown on the form. It is the responsibility of each resident to provide the very small amount of power necessary to keep the light on all night even if they are not using the house. If you have any questions having to do with street lights, please attend a Board Meeting at 10:00am on the third Monday of each month. There is no direct cost to you for having your light repaired!
