

# **MANUFACTURED HOME WINTERIZATION CHECKLIST**

1. **GET YOUR FURNACE INSPECTED!** Contact a HVAC specialist to do this.
2. Stock up on furnace filters and change them regularly.
3. Inspect the exterior of your home especially the windows and doors.
4. Check the skirting. Make sure it is secure and not cracked, missing or coming out of the top or bottom underpinning.
5. Repair any broken glass.
6. Clean out the gutters.
7. Check all downspouts.
8. Check the roof. Bad shingles should be replaced.
9. Inspect the underbelly and the insulation under your home. There should be no open areas or exposed water lines.
10. **INSPECT THE HEAT TAPE AND MAKE SURE IT IS WORKING PROPERLY AND WELL INSULATED!**
11. Garden hoses should be removed from exterior faucets and drained.
12. Keep a snow shovel handy:)
